Professional Summary

Flexible and performance-oriented professional with hands-on experience in data analysis, software development, and process improvement. Proficient in Python, Power BI, Excel, and web technologies, with a history of delivering effective solutions across a range of projects. Strong team player with proven track record of learning quickly, resolving complex problems, and adding value in dynamic, fast-paced settings.

Skills

Programming: Python, Apex, C, R

Data Tools: Power BI, Excel, OpenCV, Grad-CAM, Arduino

Web/Frameworks: HTML, CSS, JavaScript

Methodologies: Business Analysis, Financial Modeling, Agile, Requirements Gathering

Databases: MySQL

Experience

Business Analyst Intern - Avijo (Healthtech Startup)

Apr 2025 – Oct 2025

- Developed financial models for SaaS pricing, revenue strategy, projecting a 12% increase in ARR.
- Streamlined operational workflows with SOPs, improving team efficiency, reducing delays by 30%.
- Conducted market research to support GTM planning and strategic positioning of new features.

Salesforce developer Intern - Salesforce

Nov 2023 – Feb 2024

- Built Lightning Web Components (LWC) to improve UI responsiveness and team workflows.
- Developed Apex-based business logic to streamline processes and enable custom workflows.
- Integrated REST APIs to automate lead processing and enhance data synchronization.

Education

B.Tech in Computer Science, Specialization: AI & Machine Learning

Siddhartha Academy of Higher Education

Oct 2022 – Apr 2026

CGPA: 8.7 / 10.0

Projects

Illegal Tree Logging Detection System (AI + IoT)

Tools: OpenCV, CNN, Arduino-GSM

- Built a real-time monitoring system to detect illegal logging with 85% accuracy using computer vision.
- Reduced response time by 60% via automated SMS alerts to forest officials.

Chest X-ray Image Analysis for Multi-Disease Detection

Tools: Python, CNN, Grad-CAM, NLP, HTML/CSS

- Created a diagnostic tool for disease detection (e.g., pneumonia) with over 80% accuracy.
- Automated radiology report generation using NLP, reducing manual input time by 70%.

Certifications

- Business Analysis Fundamentals – Microsoft / LinkedIn Learning
- Google Analytics for Beginners – Google Academy
- Python and Problem Solving – HackerRank
